THE MCA ALTERNATIVE

## Optimum Performance

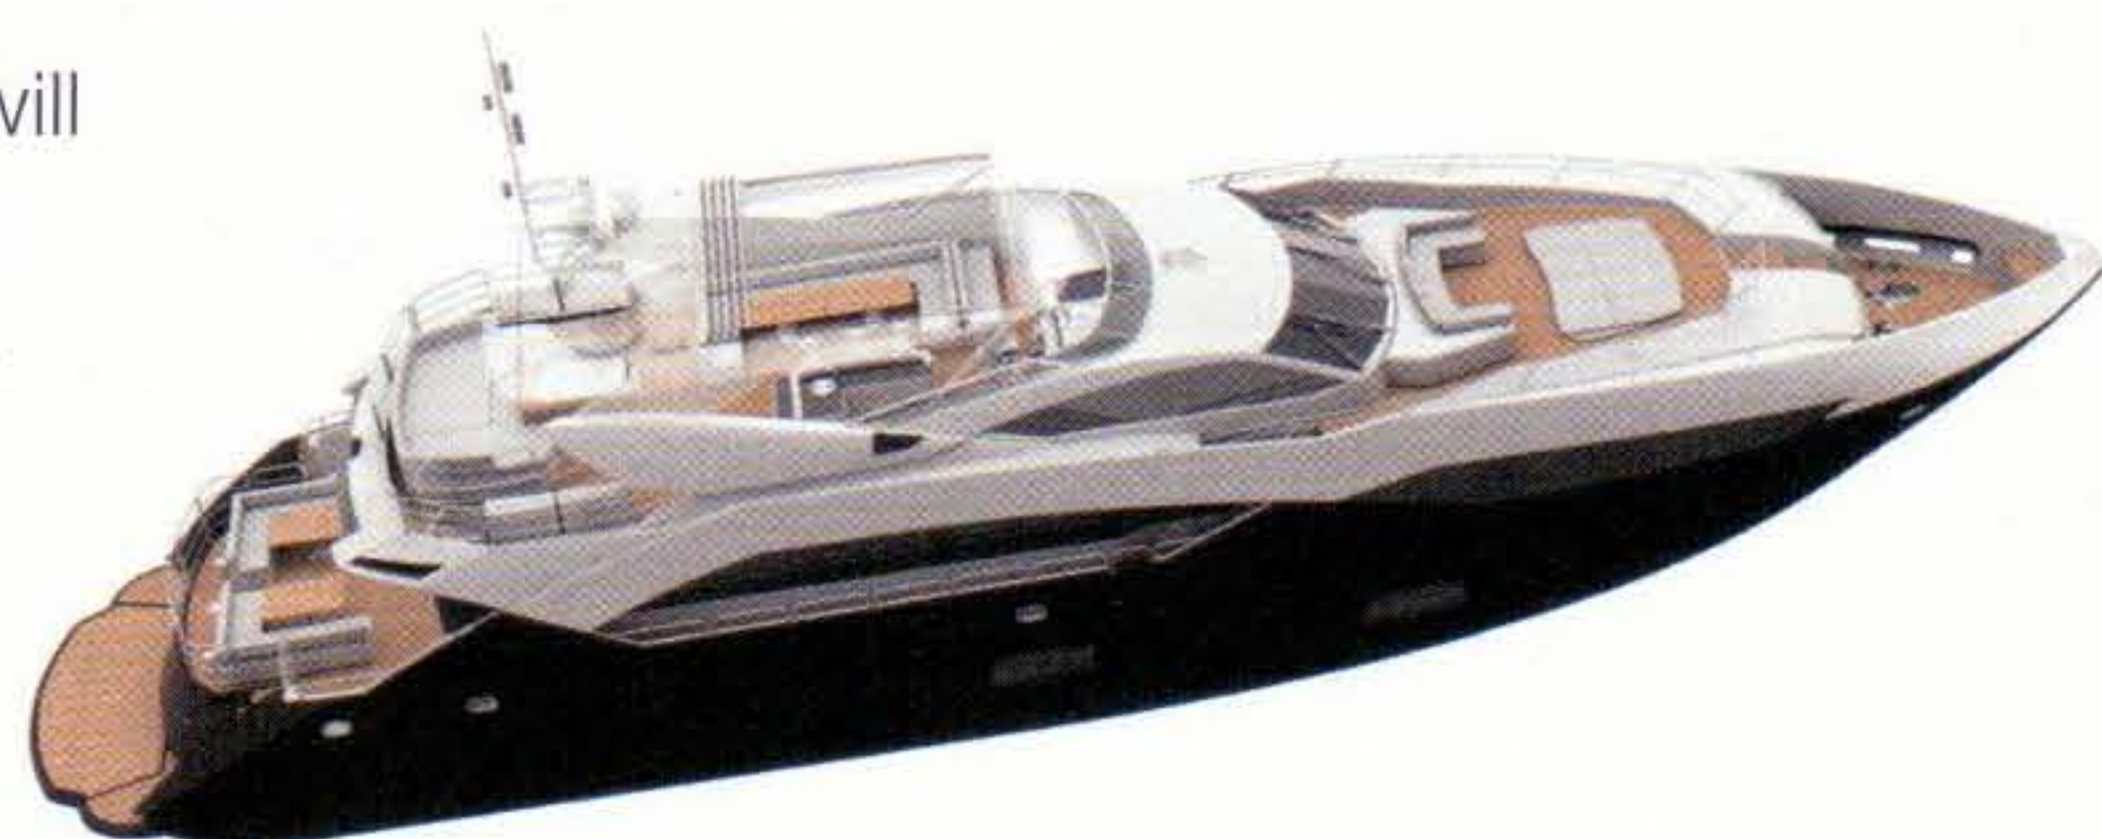

In Denmark Danish Yachts and Marquip are in the final phase of completing Project 116, an Espen Øino 50 knot jet-driven yacht. MarQuip has a team of design and engineering specialists in exhaust systems and their in-house design engineers have worked closely with the technicians at Danish

Yachts to ensure compatibility and optimum performance of this 38 m AeroCruiser. The exhaust system that the MarQuip engineers designed for Danish Yachts had to meet the exact performance demands at top speeds. The underwater scoop, as an integrated part of the total backpressure control, was optimised for reduced drag and the systems have been designed for efficient exhaust gas cooling and minimum vibration.

## Voluminous Predator

Sunseeker International will launch an exciting new addition to their Predator range at the forthcoming London International Boat Show, at Excel London from

7-16 January 2011. The all new Predator 115 maximises internal space and combines exhilarating performance with luxurious design. She has the exterior deck space of a yacht but remains typical for the Predator range in her look, with an exemplary level of onboard luxury. She can comfortably accommodate a party of up to ten in five cabins. The salon can include a long or short layout, dependent on the client's preference for additional inside or outside space. There are several Predator 115s in production and orders already confirmed well into 2012.

## Mazu Splash

In China, MCC's new 46m motoryacht Mazu has been launched, a proud moment for naval architect Kasia Milewska and project manager Albrecht Buchner. She is the second yacht in the Marco Polo series and has an impressive 9.20m beam and draws 2.90 m. Her cruising range is no less than 7,000 nm at 11 knots and 3300 nm at 13 knots. Just like her sister ship she is powered by a CAT 3512B, 1911HP at 1,600 rpm. Her hull colour, in contrast to Marco Polo's recognised distinctive green. Mazu is adorned with an eye-catching Burgundy red coating. MCC now focuses on their new MCC 38m Transocean Explorer. Also the work of in-house naval architect Kasia Milewska, it takes its cue from the Marco Polo series.

## Paint Division

Based in Southeast Asia, luxury yacht company Yacht Solutions has teamed up with Scott Taylor to head up its paint division to ensure the firm meets an increasing demand for yacht detailing and finishing. Mr Taylor brings 25 years of experience in yacht painting, fairing applications and project management to the company, having been employed by such as Camper & Nicolson, Devonport Yachts, VT shipyard UK and Royal Denship Denmark. Yacht Solutions' Managing Director Gareth Twist comments: "More yachts are coming to Thailand for their paint solutions, thanks to the growth in the superyacht industry in Asia, and we are seeing an increase in yachts being re-fitted and repaired here."
